ROKESLY INFANTS SCHOOL

Calculations Policy

Rokesly Infant and Nursery School Calculations Policy

The following pages show the *Maths* progression in calculation (addition, subtraction, multiplication and division) and how this works in line with the National Curriculum. The consistent use of the **concrete, pictorial, abstract** approach helps children develop mastery across all the operations in an efficient and reliable way. This policy shows how these methods develop children's confidence in their understanding of both written and mental methods.

EYFS	
Children develop the core ideas that underpin all calculation. In the early years, children are provided with 'opportunities to develop and improve their skills in counting, understanding and using numbers, calculating simple addition and subtraction problems; and to describe shapes, spaces, and measures'	
THE UNIQUE CHILD (OBSERVING HOW A CHILD IS LEARNING)	POSITIVE RELATIONSHIPS (TEACHING AND PROVISION)
RECEPTION – Autumn 1 – **Settling In** **Number** - Recognise some numerals of personal significance. Recognise numerals 1to 5. Count actions or objects which cannot be moved. Count objects to 10 & beginning to count beyond 10. Count out up to six objects from a larger group. Count up to three or four objects by saying one number name for each item. **Shape, Space and Measure** - Recreate patterns & build models. Order /sequences familiar events.	Draw attention to where numerals are in and outside the class. Daily class counting; count claps, stamps, jumps etc e.g. in P.E. Warm up. Encourage number language in play (i.e. contextual) Learn number rhymes daily using props e.g. 5 speckled frogs; Little Firemen; Currant Buns; little ducks Peter hammers 10 fat sausages/green bottles; elephants; one man went to mow make deliberate mistakes for c to correct Demonstrate representing how many, then keep a tally
RECEPTION – Autumn 2 – **Day and Night** **Number** – Count objects to 10, and beginning to count beyond 10 Select the correct numeral to represent 1-5, then 1-10 objects. Record using marks that they can interpret and explain. Find one more or one less from a group of up to 5 objects, then 10 objects 40-60+ **Shape, Space and Measure** - Recreate patterns & build models. Order /sequences familiar events. Show and talk about money and the cost of things.	Daily discussion of 'how many' e.g. 3 at the sand, 4 in the role play area encourage c to count before joining an activity. Play games with counting/sorting resources, Use of large number tiles for ordering numerals to 15(+) with a group of children. (1 more 1 less) Daily class counting (number of children in class, number having school dinner etc) Sing Five Currant Buns… using 1p coins, 10 fireworks,10 green bottles with numbered bottles, play shop
RECEPTION – Spring 1 - **Changes** **Number** – Count objects to 10, and begin to count beyond 10 Select the correct numeral to represent 1-5, then 1-10 objects. Use the language of more and fewer to compare 2 sets of objects	Use of large number tiles for ordering numerals to 15(+) with a group of children. Daily class counting. Chant, count on and back daily as necessary in whole class sessions, for fruit and register.

Record using marks that they can interpret and explain – number sentences Count an irregular arrangement of up to 10 objects Say the number that is one more than a given number **Shape, Space and Measure** - Orders 2 or 3 objects by length or height	Record simple number sentences on the board using + and – Measuring the children. Height comparison. Order objects around the classroom by size/weight Collect rainwater and measure/compare quantities. Sorting types of potatoes/ measuring/weighing potatoes
RECEPTION - Spring 2 – **Fantastic Folk** **Number** – Count objects to 10 and begin to count beyond to 20 In practical activities and discussions. Begin to use the vocabulary involved in adding and subtracting. Begin to identify own mathematical problems based on own interests and fascinations. **Shape, Space and Measure -** Use everyday language related to time and measure short periods of time in simple way	Monster Maths – Have a maths monster who sits on your board during all maths activities and gets everything right at first but starts making mistakes. Read 'How big is a million?' children discuss big numbers that mean something to them. Monster numberline to 10 and beyond 100 square bingo – crossing numbers off for children house numbers, bus numbers, important numbers to them. Counting and number matching assessment individual to each class interests. Calculation– adding and subtracting, where appropriate recording with symbols. Monster dressing with adding/doubling using monster templates – use buttons for adding and doubling Mathematical language e.g. addition, 1 more, more than, plus/minus, less than, subtract, equals – Make a number sentence Monster cooking – fractions – halves and quarters. Number estimates and predictions.- objects in a jar – daily guessing quantity.
RECEPTION – Summer 1 – **Once upon a number** **Number** - In practical activities and discussion, begin to use vocabulary involved in adding and subtracting. Record using marks that they can interpret and explain. Begin to identify own mathematical problems based on own interests and fascinations. **ELG:** Children count reliably with numbers from one to 20, place them in order and say which number is one more or one less than a given number. Using quantities and objects, they add and subtract two single-digit numbers and count on or back to find the answer. They solve problems, including doubling, halving and sharing. **Shape, Space and Measure -** Order two or three items by length or height; weight or capacity. Use everyday language related to time. Measure time in simple ways. Beginning to use everyday language related to money.	Number leaves on the beanstalk Count the number of things in the giant's tummy or the wolf's sandwich. Count and label no. of characters in each story Use bears, beans, pigs etc for addition/ subtraction games; adding two groups together, counting on using fingers, subtracting from a larger group; using a number track and a dice. Record simple number sentences using + and – symbols. Measuring feet for Cinderella – creating 2simple graphs Measuring Giant, Jack etc. using standard and non standard measures. The wolf has three sandwiches – can they measure them in piggies Give children the opportunity to weigh objects: straw, a brick etc Counting the Giant's money.

ELG: Children use everyday language to talk about size, weight, capacity, position, distance, time and money to compare quantities and objects and to solve problems. Recognise, create and describe patterns	
RECEPTION – Summer 2 – **Habitats** **Number** - Count objects to 10, and begin to count beyond 10(40-60) Select the correct numeral to represent 1-5, then 1-10 objects. (40-60) Find 1 less from a group up to 5/10/20 (differentiated) Record using marks that they can interpret and explain. (40-60) Estimate how many objects they can see and checks by counting them (4060) **Shape Space and Measure** – Use familiar objects and common shapes to create and recreate patterns and build models. Begin to use mathematical names for solid 3d shapes and for flat 2d shapes and mathematical terms to describe shapes (40-60) **ELG11 ELG12**	Mental maths e.g. I have three doughnuts and two people, how can I share the doughnuts fairly? Tally charts –favourite animal Minibeast tally and count up large number of bugs. Learn numerals to 20 and beyond – differentiated. Counting and number matching assessment individual to each class interests. Calculation – adding and subtracting, where appropriate recording with symbols – own class. Incidental looking at clock at various points of day. Have pictures around the clock of key times eg lunch, playtime, tidy up time etc. O'clock and half past Number estimates and predictions.- objects in jar – daily guessing quantity. Money and real life problems. – role play indoor and outdoor. (garden centre/seed packets) Recognising coins. Number bonds to 10. (ladybird game, matching cards etc or how many more spiders to make 5).

KEY STAGE 1
Children develop the core ideas that underpin all calculation. They begin by connecting calculation with counting on and counting back, but they should learn that understanding wholes and parts will enable them to calculate efficiently and accurately, and with greater flexibility. They learn how to use an understanding of 10s and 1s to develop their calculation strategies, especially in addition and subtraction.
Key language: whole, part, ones, ten, tens, number bond, add, addition, plus, total, altogether, subtract, subtraction, find the difference, take away, minus, less, more, group, share, equal, equals, is equal to, groups, equal groups, times, multiply, multiplied by, divide, share, shared equally, times-table

Addition and subtraction: Children first learn to connect addition and subtraction with counting, but they soon develop two very important skills: an understanding of parts and wholes, and an understanding of unitising 10s, to develop efficient and effective calculation strategies based on known number bonds and an increasing awareness of place value. Addition and subtraction are taught in a way that is interlinked to highlight the link between the two operations. A key idea is that children will select methods and approaches based on their number sense. For example, in Year 1, when faced with 15 − 3 and 15 − 13, they will adapt their ways of approaching the calculation appropriately. The teaching should always emphasise the importance of mathematical thinking to ensure accuracy and flexibility of approach, and the importance of using known number facts to harness their recall of bonds within 20 to support both addition and subtraction methods. In Year 2, they will start to see calculations presented in a column format, although this is not expected to be formalised until KS2. We show the column method in Year 2 as an option; teachers may not wish to include it until Year 3.	**Multiplication and division:** Children develop an awareness of equal groups and link this with counting in equal steps, starting with 2s, 5s and 10s. In Year 2, they learn to connect the language of equal groups with the mathematical symbols for multiplication and division. They learn how multiplication and division can be related to repeated addition and repeated subtraction to find the answer to the calculation. In this key stage, it is vital that children explore and experience a variety of strong images and manipulative representations of equal groups, including concrete experiences as well as abstract calculations. Children begin to recall some key multiplication facts, including doubles, and an understanding of the 2, 5 and 10 times-tables and how they are related to counting.	**Fractions:** In Year 1, children encounter halves and quarters, and link this with their understanding of sharing. They experience key spatial representations of these fractions, and learn to recognise examples and non-examples, based on their awareness of equal parts of a whole. In Year 2, they develop an awareness of unit fractions and experience non-unit fractions, and they learn to write them and read them in the common format of numerator and denominator.

Year 1			
	Concrete	**Pictorial**	**Abstract**
Year 1 **Addition**	**Counting and adding more** Children add one more person or object to a group to find one more.	**Counting and adding more** Children add one more cube or counter to a group to represent one more. *One more than 4 is 5.*	**Counting and adding more** Use a number line to understand how to link counting on with finding one more.  *One more than 6 is 7.* *7 is one more than 6.* Learn to link counting on with adding more than one.  *5 + 3 = 8*

	Understanding part-part-whole relationship Sort people and objects into parts and understand the relationship with the whole. *The parts are 2 and 4. The whole is 6.*	**Understanding part-part-whole relationship** Children draw to represent the parts and understand the relationship with the whole.  *The parts are 1 and 5. The whole is 6.*	**Understanding part-part-whole relationship** Use a part-whole model to represent the numbers.  *6 + 4 = 10*
	Knowing and finding number bonds within 10	**Knowing and finding number bonds within 10**	**Knowing and finding number bonds within 10**

	Break apart a group and put back together to find and form number bonds. *3 + 4 = 7* *6 = 2 + 4*	Use five and ten frames to represent key number bonds.  *5 = 4 + 1*  *10 = 7 + 3*	Use a part-whole model alongside other representations to find number bonds. Make sure to include examples where one of the parts is zero.   *4 + 0 = 4* *3 + 1 = 4*
	Understanding teen numbers as a complete 10 and some more Complete a group of 10 objects and count more.  *13 is 10 and 3 more.*	**Understanding teen numbers as a complete 10 and some more** Use a ten frame to support understanding of a complete 10 for teen numbers.  *13 is 10 and 3 more.*	**Understanding teen numbers as a complete 10 and some more**. *1 ten and 3 ones equal 13.* *10 + 3 = 13*

	Adding by counting on Children use knowledge of counting to 20 to find a total by counting on using people or objects.	**Adding by counting on** Children use counters to support and represent their counting on strategy.	**Adding by counting on** Children use number lines or number tracks to support their counting on strategy.

			 7 + 5 = ☐
	Adding the 1s Children use bead strings to recognise how to add the 1s to find the total efficiently. *2 + 3 = 5* *12 + 3 = 15*	**Adding the 1s** Children represent calculations using ten frames to add a teen and 1s.  *2 + 3 = 5* *12 + 3 = 15*	**Adding the 1s** Children recognise that a teen is made from a 10 and some 1s and use their knowledge of addition within 10 to work efficiently. *3 + 5 = 8* *So, 13 + 5 = 18*
	Bridging the 10 using number bonds Children use a bead string to complete a 10 and understand how this relates to the addition. *7 add 3 makes 10.* *So, 7 add 5 is 10 and 2 more.*	**Bridging the 10 using number bonds** Children use counters to complete a ten frame and understand how they can add using knowledge of number bonds to 10.  .	**Bridging the 10 using number bonds** Use a part-whole model and a number line to support the calculation.  *9 + 4 = 13*
Year 1 Subtraction	**Counting back and taking away** Children arrange objects and remove to find how many are left.	**Counting back and taking away** Children draw and cross out or use counters to represent objects from a problem.	**Counting back and taking away** Children count back to take away and use a number line or number track to support the method.

	 *1 less than 6 is 5.* *6 subtract 1 is 5.*	 9 − ☐ = ☐ There are ☐ children left.	 *9 − 3 = 6*
	Finding a missing part, given a whole and a part Children separate a whole into parts and understand how one part can be found by subtraction.  *8 − 5 = ?*	**Finding a missing part, given a whole and a part** Children represent a whole and a part and understand how to find the missing part by subtraction.  5 − 4 = ☐	**Finding a missing part, given a whole and a part** Children use a part-whole model to support the subtraction to find a missing part.  *7 − 3 = ?* Children develop an understanding of the relationship between addition and subtraction facts in a part-whole model. 	Finding the difference Arrange two groups so that the difference between the groups can be worked out.	**Finding the difference** Represent objects using sketches or counters to support finding the difference.	**Finding the difference** Children understand ‘find the difference’ as subtraction. 
 8 is 2 more than 6. *6 is 2 less than 8.* *The difference between 8 and 6 is 2.*	 *5 − 4 = 1* *The difference between 5 and 4 is 1.*	*10 − 4 = 6* *The difference between 10 and 6 is 4.*
Subtraction within 20 Understand when and how to subtract 1s efficiently. Use a bead string to subtract 1s efficiently. *5 − 3 = 2* *15 − 3 = 12*	**Subtraction within 20** Understand when and how to subtract 1s efficiently.  *5 − 3 = 2* *15 − 3 = 12*	**Subtraction within 20** Understand how to use knowledge of bonds within 10 to subtract efficiently. *5 − 3 = 2* *15 − 3 = 12*

	Subtracting 10s and 1s For example: 18 − 12 Subtract 12 by first subtracting the 10, then the remaining 2.  *First subtract the 10, then take away 2.*	**Subtracting 10s and 1s** For example: 18 − 12 Use ten frames to represent the efficient method of subtracting 12.  *First subtract the 10, then subtract 2.*	**Subtracting 10s and 1s** Use a part-whole model to support the calculation.  *19 − 14* *19 − 10 = 9* *9 − 4 = 5* *So, 19 − 14 = 5*
	Subtraction bridging 10 using number bonds For example: 12 − 7 Arrange objects into a 10 and some 1s, then decide on how to split the 7 into parts.	**Subtraction bridging 10 using number bonds** Represent the use of bonds using ten frames.	**Subtraction bridging 10 using number bonds** Use a number line and a part-whole model to support the method. *13 − 5*

	 *7 is 2 and 5, so I take away the 2 and then the 5.*	 *For 13 – 5, I take away 3 to make 10, then take away 2 to make 8.*	Year 1 Multiplication	**Recognising and making equal groups** Children arrange objects in equal and unequal groups and understand how to recognise whether they are equal. 	**Recognising and making equal groups** Children draw and represent equal and unequal groups. 	**Describe equal groups using words** *Three equal groups of 4.* *Four equal groups of 3.*
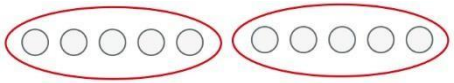
	Finding the total of equal groups by counting in 2s, 5s and 10s There are 5 pens in each pack … 5…10…15…20…25…30…35…40…	**Finding the total of equal groups by counting in 2s, 5s and 10s** 100 squares and ten frames support counting in 2s, 5s and 10s. 	**Finding the total of equal groups by counting in 2s, 5s and 10s** Use a number line to support repeated addition through counting in 2s, 5s and 10s. 
<table>
<tr>
<td>Year 1 Division</td>
<td>Grouping
Learn to make equal groups from a whole and find how many equal groups of a certain size can be made.

Sort a whole set people and objects into equal groups.</td>
<td>Grouping
Represent a whole and work out how many equal groups.
 


There are 10 in total.</td>
<td>Grouping
Children may relate this to counting back in steps of 2, 5 or 10.</td>
</tr>
<tr>
<td></td>
<td>

There are 10 children altogether.
There are 2 in each group.
There are 5 groups.</td>
<td>There are 5 in each group. There are 2 groups.</td>
<td> </td>
</tr>
<tr>
<td></td>
<td>Sharing
Share a set of objects into equal parts and work out how many are in each part.
  </td>
<td>Sharing
Sketch or draw to represent sharing into equal parts. This may be related to fractions.
  </td>
<td>Sharing
10 shared into 2 equal groups gives 5 in each group.</td>
</tr>

Year 2			
	Concrete	**Pictorial**	**Abstract**
Year 2 Addition			
Understanding 10s and 1s	Group objects into 10s and 1s.  Bundle straws to understand unitising of 10s. 	Understand 10s and 1s equipment, and link with visual representations on ten frames. 	Represent numbers on a place value grid, using equipment or numerals.  
Adding 10s	Use known bonds and unitising to add 10s. *I know that 4 + 3 = 7.* *So, I know that 4 tens add 3 tens is 7 tens.*	Use known bonds and unitising to add 10s.  *I know that 4 + 3 = 7.* *So, I know that 4 tens add 3 tens is 7 tens.*	Use known bonds and unitising to add 10s.  *4 + 3 = 7* *4 tens + 3 tens = 7 tens* *40 + 30 = 70*
Adding a 1-digit number to a 2-digit	Add the 1s to find the total. Use known bonds within 10.	Add the 1s.	Add the 1s.

number not bridging a 10	 *41 is 4 tens and 1 one.* *41 add 6 ones is 4 tens and 7 ones.* This can also be done in a place value grid. 	 *34 is 3 tens and 4 ones.* *4 ones and 5 ones are 9 ones.* *The total is 3 tens and 9 ones.* 	Understand the link between counting on and using known number facts. Children should be encouraged to use known number bonds to improve efficiency and accuracy.  This can be represented horizontally or vertically. *34 + 5 = 39* *or* Adding a 1-digit number to a 2-digit number bridging 10	Complete a 10 using number bonds. *There are 4 tens and 5 ones.* *I need to add 7. I will use 5 to complete a 10, then add 2 more.*	Complete a 10 using number bonds. 	Complete a 10 using number bonds.  *7 = 5 + 2* *45 + 5 + 2 = 52*

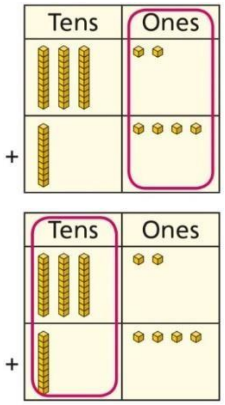
Adding a 1-digit number to a 2-digit	Exchange 10 ones for 1 ten.	Exchange 10 ones for 1 ten.	Exchange 10 ones for 1 ten.

number using exchange			

Adding a multiple of 10 to a 2-digit number	Add the 10s and then recombine. *27 is 2 tens and 7 ones.* *50 is 5 tens.* *There are 7 tens in total and 7 ones.* *So, 27 + 50 is 7 tens and 7 ones.*	Add the 10s and then recombine.  *66 is 6 tens and 6 ones.* *66 + 10 = 76* A 100 square can support this understanding.  	Add the 10s and then recombine. *37 + 20 = ?* *30 + 20 = 50* *50 + 7 = 57* *37 + 20 = 57*
Adding a multiple of 10 to a 2-digit number using columns	Add the 10s using a place value grid to support.	Add the 10s using a place value grid to support.	Add the 10s represented vertically. Children must understand how the method relates to unitising of 10s and place value.

	 *16 is 1 ten and 6 ones.* *30 is 3 tens.* *There are 4 tens and 6 ones in total.*	 *16 is 1 ten and 6 ones.* *30 is 3 tens.* *There are 4 tens and 6 ones in total.*	 *1 + 3 = 4* *1 ten + 3 tens = 4 tens* *16 + 30 = 46*
Adding two 2-digit numbers	Add the 10s and 1s separately.  *5 + 3 = 8* *There are 8 ones in total.* *3 + 2 = 5* *There are 5 tens in total.* *35 + 23 = 58*	Add the 10s and 1s separately. Use a part-whole model to support.  *11 = 10 + 1* *32 + 10 = 42* *42 + 1 = 43* *32 + 11 = 43*	Add the 10s and the 1s separately, bridging 10s where required. A number line can support the calculations.  *17 + 25*

Adding two 2-digit numbers using a place value grid	Add the 1s. Then add the 10s.		Add the 1s. Then add the 10s.

Adding two 2-digit numbers with exchange	Add the 1s. Exchange 10 ones for a ten. Then add the 10s. 		Add the 1s. Exchange 10 ones for a ten. Then add the 10s. Year 2 Subtraction			

Subtracting multiples of 10	Use known number bonds and unitising to subtract multiples of 10.	Use known number bonds and unitising to subtract multiples of 10.	Use known number bonds and unitising to subtract multiples of 10.

	 *8 subtract 6 is 2.* *So, 8 tens subtract 6 tens is 2 tens.*	 *10 − 3 = 7* *So, 10 tens subtract 3 tens is 7 tens.*	 *7 tens subtract 5 tens is 2 tens.* *70 − 50 = 20*
Subtracting a single-digit number	Subtract the 1s. This may be done in or out of a place value grid.  	Subtract the 1s. This may be done in or out of a place value grid.  	Subtract the 1s. Understand the link between counting back and subtracting the 1s using  known bonds.  *9 − 3 = 6* *39 − 3 = 36*

Subtracting a single-digit number bridging 10	Bridge 10 by using known bonds.  *35 − 6* *I took away 5 counters, then 1 more.*	Bridge 10 by using known bonds.  *35 − 6* *First, I will subtract 5, then 1.*	Bridge 10 by using known bonds.  *24 − 6 = ?* *24 − 4 − 2 = ?*
Subtracting a single-digit number using exchange	Exchange 1 ten for 10 ones. This may be done in or out of a place value grid.	Exchange 1 ten for 10 ones.	Exchange 1 ten for 10 ones.

			 *25 − 7 = 18*
Subtracting a 2-digit number	Subtract by taking away.  *61 − 18* *I took away 1 ten and 8 ones.*	Subtract the 10s and the 1s. This can be represented on a 100 square. 	Subtract the 10s and the 1s.  This can be represented on a number line. *64 − 41 = ?* *64 − 1 = 63* *63 − 40 = 23* *64 − 41 = 23*  *46 − 20 = 26* *26 − 5 = 21* *46 − 25 = 21*

Subtracting a 2-digit number using place	Subtract the 1s. Then subtract the 10s. This may be done in or out of a place value grid.	Subtract the 1s. Then subtract the 10s.	Using column subtraction, subtract the 1s. Then subtract the 10s.

value and columns	 *38 − 16 = 22*		
Subtracting a 2-digit number with exchange		Exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s. 	Using column subtraction, exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s. T O 4 5 − 2 7 T O $^{3}\not{4}$ $^{1}5$ − 2 7 T O $^{3}\not{4}$ $^{1}5$ − 2 7 8 T O $^{3}\not{4}$ $^{1}5$ − 2 7 1 8
Year 2 Multiplication			

Equal groups and repeated addition	Recognise equal groups and write as repeated addition and as multiplication. *3 groups of 5 chairs* *15 chairs altogether*	Recognise equal groups using standard objects such as counters and write as repeated addition and multiplication.  *3 groups of 5* *15 in total*	Use a number line and write as repeated addition and as multiplication.  *5 + 5 + 5 = 15* *3 × 5 = 15*
Using arrays to represent multiplication and support understanding	Understand the relationship between arrays, multiplication and repeated addition. *4 groups of 5*	Understand the relationship between arrays, multiplication and repeated addition.  *4 groups of 5 … 5 groups of 5*	Understand the relationship between arrays, multiplication and repeated addition.  *5 × 5 = 25*

Understanding commutativity	Use arrays to visualise commutativity. *I can see 6 groups of 3.* *I can see 3 groups of 6.*	Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication.  *This is 2 groups of 6 and also 6 groups of 2.*	Use arrays to visualise commutativity. *4 + 4 + 4 + 4 + 4 = 20* *5 + 5 + 5 + 5 = 20* *4 × 5 = 20 and 5 × 4 = 20*
Learning ×2, ×5 and ×10 table facts	Develop an understanding of how to unitise groups of 2, 5 and 10 and learn corresponding times-table facts.	Understand how to relate counting in unitised groups and repeated addition with knowing key times-table facts.	Understand how the times-tables increase and contain patterns.

	 3 groups of 10 … 10, 20, 30 *3 × 10 = 30*	 *10 + 10 + 10 = 30* *3 × 10 = 30*	 *5 × 10 = 50* *6 × 10 = 60*

Year 2 Division			
Sharing equally	Start with a whole and share into equal parts, one at a time.	Represent the objects shared into equal parts using a bar model.	Use a bar model to support understanding of the division.

	 *12 shared equally between 2.* *They get 6 each.* Start to understand how this also relates to grouping. To share equally between 3 people, take a group of 3 and give 1 to each person. Keep going until all the objects have been shared  *15 shared equally between 3.* *They get 5 each.*	 *20 shared into 5 equal parts.* *There are 4 in each part.*	 *18 ÷ 2 = 9*

Grouping equally	Understand how to make equal groups from a whole. *8 divided into 4 equal groups.*	Understand the relationship between grouping and the division statements.	Understand how to relate division by grouping to repeated subtraction.
	There are 2 in each group.	12 ÷ 3 = 4 12 ÷ 4 = 3 12 ÷ 6 = 2 12 ÷ 2 = 6 	 There are 4 groups now. *12 divided into groups of 3.* *12 ÷ 3 = 4* *There are 4 groups.*

Using known times-tables to solve divisions	Understand the relationship between multiplication facts and division.  *4 groups of 5 cars is 20 cars in total.* *20 divided by 4 is 5.*	Link equal grouping with repeated subtraction and known times-table facts to support division.  *40 divided by 4 is 10.* Use a bar model to support understanding of the link between times-table knowledge and division. 	Relate times-table knowledge directly to division. 1 × 10 = 10 2 × 10 = 20 **3 × 10 = 30** 4 × 10 = 40 5 × 10 = 50 6 × 10 = 60 7 × 10 = 70 8 × 10 = 80 I used the 10 times-table to help me. 3 × 10 = 30. *I know that 3 groups of 10 makes 30, so I know that 30 divided by 10 is 3.* *3 × 10 = 30 so 30 ÷ 10 = 3*
